

XALINK ISM

INTELLIGENT SHELVING

www.trackerpoint.com

Powered by
XALINK

Our Solution

XALINK ISM turns any shelf into an intelligent shelf.

Our unique combination of RFID & AI locates items - instantly.

No need for custom shelving.

No more searching!

How it Works

Items are uniquely labelled and registered into XALINK to create the inventory.

Items are then automatically located when placed on any shelf.

Our interactive map displays location information, and a shelf light activates to guide you to the item.

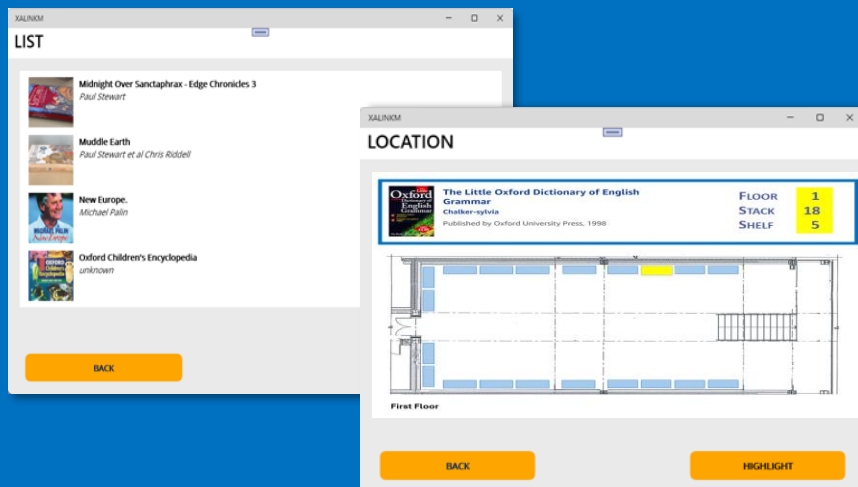

Automatic Item Detection

Interactive Map for Location Guidance

Shelf Light Indication for Visual Reference
